## PERSONAL PROFILE

Java developer with a background in Big Data. I have experience building distributed systems, data processing pipelines, web applications development, and various types of integrations. Passionate about development experience improvements, process automation, and DevOps practices. I am interested in distributed systems, high-load applications, and clean architectures. I am always ready to learn something new and improve my skills.

## EXPERIENCE

- 6/2022 – present **Senior Java Developer** **T1-consulting [t1-consulting.ru]**
- Designing architecture for search application inside a platform
  - Developing MVPs for search services: Kafka interactions, full-text search, API
  - Collaborating with teams inside a platform to create integrations. Designing and implementing integrations
- Java / ElasticSearch / ScyllaDb / Kafka
- 6/2020 – 6/2022 **Senior Big Data Engineer** **JettyCloud [jettycloud.com] / RingCentral [ringcentral.com]**  
2 years
- Implemented new pipelines for data processing. Delivered application data from AppsFlyer platform, implemented data ingestion from Salesforce
  - Adopted and modernized previous solutions to meet new compliance. Migrated existing pipelines from Hadoop to Spark standalone architecture
  - Took part in the disaster recovery project. Implemented Kafka interactions between services of main and recovery clusters
  - Worked on integration tests infrastructure. Kickstarted a new approach to integration testing. Tuned CI/CD pipeline to automate tests. Implemented integration tests approach for 2 projects
- Java / Scala / Hadoop / Spark / Amazon S3 / Vertica / Snowflake / Kafka
- 2/2018 – 6/2020 **Senior Java Developer** **Luxoft [luxoft.com]**  
2 years 5 months
- Developed mail sorting automation application for RussianPost. Added functionality to work with international mail
  - Created new services to interact with industrial sorting machines. Upgrade allowed to add sorting machine in unified mail infrastructure
  - Developed new analytics service which allowed analysis mail status and generate reports
  - Implemented integrations inside the RussianPost platform with different protocols: Kafka, SOAP, AMQP, REST
- Spring(Boot/WS/Integration/AMQP) / PostgreSQL / JavaScript / React / RabbitMQ
- 4/2016 – 2/2018 **Java developer** **GazInformService [gaz-is.ru]**  
1 year 11 months
- Worked as part of a cross-functional team to develop core of Identity Management System
  - Collaborated with integration team to provide a wide range of integrations
  - Planned and implemented new features for the system
- Java / OSGI / Docker / PostgreSQL / ElasticSearch / Activiti BPMN

## EDUCATION

2004 – 2010 **Specialist Degree** **Baltic State Technical University "Voenmeh" D.F. Ustinov**  
Automated information processing and management systems

## LANGUAGES

**Russian** - Native  
**English** - Advanced  
**French** - Beginner

## CERTIFICATES

- Luxoft-training: Spring Framework 5 for Application Development
- Luxoft-training: OWASP Top 10 Security Risks
- Rebrain workshops: Logs (ELK stack), PostgreSQL, Python
